OmniConnectors, launching a new Web Site!

Omniconnectors is launching it's new site within the month.

With our new fully functional site, our clients will be able to access its content faster and in a more friendly manner. “We have

realized the need for a more efficient type of site viewing”, says Mr. Louis Pharand, International Consultant.

Dr Harry Andrianjafy

Will be featured in a documentary directed by Alistair Sinclair and Louis Pharand in Madagascar.

“ In a world filled with fear about the long term survival of its inhabitants; where global warming threatens to destroy the arctic circle and creates drought even in more stable climates like Australia; where pollution caused by greenhouse gases is the norm rather than the exception; where energy is drawn from depleting natural resources such as coal, wood and oil: in a world like this, how do we stop this vicious circle and ensure the long term stability for generations to come?”
(Dennis Andrianjafy)

Dr Andrianjafy, inventor of “FATANA” a stove that by itself, has the potential of saving the forest and ecosystem of Madagascar.

MR PHARAND'S LATEST ACTIVITIES ABROAD

While away from Madagascar, Louis Pharand has been approached on many levels. He actually has picked up seven new mandates.

Of these seven new mandates, four are eco friendly and in the energy sector. We will follow up on these new mandates in upcoming newsletters.

(Louis Pharand, Louis Villeneuve, Hugo Bergeron and Carine Guay.)

Mr. Pharand also took time to fly up north in Canada for an extended period of time airlifting fire fighters by helicopter into inaccessible areas.

Following his forest saving activities. Louis Pharand was invited to step back in time and reactivate himself into the fascinating world of motion pictures.

Dr Andrianjafy Vulgarization Campaign 2007

Actual Burner (Fatana)

Jason Statham

He actually appeared as a stuntman in Death Race 3000, a movie starring Jason Statham (Transporter) coming out in 2008 /2009

to be continued...
